

This publication was prepared by the Centers for Disease Control and Prevention (CDC). It summarizes state-level data collected from each of the 50 states and the District of Columbia during the School Health Policies and Programs Study (SHPPS) 2000. SHPPS is conducted periodically to monitor the extent to which school health policies and practices are addressing the leading causes of death, illness, and social problems among young people and adults.

SHPPS 2000 provides information about the following school health program components: health education, physical education, health services, mental health and social services, food service, school policy and environment, faculty and staff health promotion, and family and community involvement.

For additional information on SHPPS or to order SHPPS publications, contact the Centers for Disease Control and Prevention, National Center for Chronic Disease Prevention and Health Promotion, Division of Adolescent and School Health, 4770 Buford Highway, NE, Mailstop K-33, Atlanta, GA 30341-3717; (888) 231-6405; www.cdc.gov/shpps.
